Fel-Pro PermaTorque MLS Head Gasket Suit Ford 302-351W, 351C SVO, 4.200" gasket bore, .041" compressed thickness

Federal-Mogul's Fel-Pro PermaTorqueMLS multi-layer steel (MLS) head gaskets are designed and manufactured to handle the special needs of big power engines - supercharged, nitrous injected or naturally aspirated. PermaTorqueMLS head gaskets provide the following benefits:

- MLS maintains contact pressure between the cylinder head and block.
- Seals combustion, oil and coolant despite extreme horizontal and vertical motion between head and block
- Distributes clamping loads strategically across the entire cylinder head for optimised sealing.

Fel-Pro PermaTorqueMLS is the ultimate in combustion sealing
