Description

Pavtek Part #CS1000

SBC Rollmaster Double Row Timing Gear Set With Brass Washer - Non Torrington

All Red Label timing sets are produced using billet steel for both the crank and camshaft sprockets. Premier sets are nitride hardened and include a one-piece Torrington and Iwis chain.

Rollmaster timing sets are light weight and stronger than any other timing set available due to the weight savings of billet steel and CNC machinery. No additional machining is required to fit these sets or the need for offset bushings or drilling of cam gears.

All Red Label timing sets come standard with Rollmasters own premium grade Iwis full roller timing chain.
