ICE IGNITIONS - "THE CHOICE OF CHAMPIONS"
Pavtek have been using Ice ignition systems for over 15 years on all of our engine combinations. Why ?
Because we've tested and compared to other leading brands and found these results. ICE Ignition systems work !
Now everybody else in the world knows what we've always known.
CE FEATURES:
ivery ICE distributor features a CNC machined 6061 aircraft grade aluminium body, hardened and precision centreless ground 4130 chromoly shaft, high temperature upper roller bearing and il impregnated sintered iron lower bush.
riggering via accurate and reliable Hall Effect vane sensor unaffected by dirt, moisture or vibration
IEI style distributor caps featuring brass terminals for long service life under extreme operating conditions.
Long duration and high intensity spark - up to 40 times more spark duration than CDI systems

Products and packages to suit naturally aspirated street engines thru to blown alcohol burning race cars

Your choice of distributor gear material to suit your cam at no extra charge
