Description

Pavtek Part #ED-2975

Chevrolet 262-400 Small-Block V8

VICTOR JR. (3500-8000 rpm)

These versatile manifolds are excellent for many applications from high-performance street to drag/circle track racing. They provide maximum performance for engines with standard port location, iron and aluminum cylinder heads. The low-profile of the #2975 works well in applications with minimal hood clearance and where 1" or 2" spacers can be used for performance tuning. When carb spacers are not allowed, the #2999 should be used.
